COMMON SEO ISSUES

Meta Title	<p>✓ The meta title of your page has a length of 99 characters. Most search engines will truncate meta titles to 70 characters.</p> <hr/> <p>→ آموزش مجازی بیمه - اخبار بیمه - سایت بیمه - مجله بیمه دات کام - مجله الکترونیکی بیمه دات کام آموزش</p>
Meta Description	<p>✗ The meta description tag is missing from your page. You should include this tag in order to provide a brief description of your page which can be used by search engines. Well-written and inviting meta descriptions may also help click-through rates to your site in search engine results.</p> <hr/> <p>HOW TO FIX META DESCRIPTION</p> <p>In order to pass this test you must include a meta-description tag in your page header (<head> section):</p> <pre data-bbox="427 1227 1524 1355"><head> <meta name="description" content="type_your_description_here"> </head></pre> <p>Note that in HTML the <meta> tag has no end tag but in XHTML this tag must be properly closed.</p> <p>Meta description can have any length but a good practice is to keep this under 160 characters (search engines generally truncate snippets longer than this value).</p>
